

## JINR

up quark, there's no need to feel down  
I said up quark, get excited from ground  
state, so up quark, get some non-zero mass  
there's no need to be chiral

up quark there's a place you can be  
if you want to restore your symmetry  
They call it NICA and I'm sure you can find  
there a way to get deconfined

Its fun to stay at the JINR  
Its fun to stay at the JINR  
They have everything that a physicist seeks  
you can hang out with all those freaks

Its fun ...

student, you need to go to that school  
concerning matter, that is dense and that's cool.  
learn about its equation of state  
and its impact on a star's fate

Even if you're interested in  
Heavy Ions in a Collider Ring  
and in matter, which is hot and delute  
you can visit Joint Institute

Its fun ...  
Its fun ...

late night, after S-S-T-P  
get a Pizza down at Pizzeria  
and at Laguna get whatever you wish  
but you wait one hour for dish

you also need something to drink  
because Vodka helps you to think  
and remember what they try us to teach  
and relax after this at the beach

Its fun ...  
Its fun ...
